

Dr. Gregory Stock

One of the World's Leading Authorities on Genomics and Biotech

CSA CELEBRITY SPEAKERS

Dr Stock was the founding director of UCLA's influential Program on Medicine, Technology and Society. He is a leading advocate for aggressive life science research and its global strategic importance. He presently is exploring key drivers of pharma development. Stock sits on California's Stem Cell Advisory Board and is the founder of Signum, a biopharmaceutical company developing therapeutics for Alzheimer's and Parkinson's.

"Dr. Gregory Stock offers a convincing rebuttal to those who fear we are hurtling towards some deadly reckoning"

In detail

Dr Stock holds a doctorate in Biophysics from John Hopkins and an MBA from Harvard. He was a fellow at Princeton's prestigious Woodrow Wilson School and is the founding CEO of Signum Biosciences. He serves on the board of Napo Pharmaceuticals and is the Associate Director of Berkeley's Center for Life Science Policy. Dr. Stock has examined the implications of the Biotech revolution through his many papers, lectures, debates, books and media appearances. He has also organized seminal conferences that have shaped today's debate about human enhancement, genetic design and increased longevity.

What he offers you

Gregory Stock inspires and challenges audiences with a compelling vision of the far reaching consequences of the genomics and biotech revolutions. He provides perspective on the economic, political, social and ethical challenges these new technologies will bring. He makes the case for hope and possibility.

How he presents

His presentations are provocative, engaging, accessible distillations of recent technological advances and how they will remake our lives and challenge our sense of what it is to be human. He provides a riveting, eye-opening glimpse of the sometimes dizzying future that awaits us. He is unforgettable.

Topics

- From Darwin to Destiny: Genomics and the Human Future
- Where are the Wonder Drugs? Strategies for Unbridling Biotech
- Pharmacogenomics and Natural Products: The Coming Revolution
- The Next Frontier: Ourselves

Languages

He presents in English.
