

## Testimonial

“After a turbulent year of re-designing the organization, it was time to revitalize the team and make sure that they accept the changes and find the energy to look forward positively, shift their focus towards the market and grow the business. For this reason, we asked Miha to perform his inspiring act and touch the people. We were together with 120 people and Miha was able to touch them all; in a different way, but all were somehow touched; that is what music-process does to people. In combination with an inspiring speech about transformation, we were able to set the scene for the next days. The meeting ended up with a totally revitalized team that is looking forward to focus on our customers, find new customers and grow the business. Thanks Miha for creating the conditions to reach this result!”
