

Andy Green OBE

Holder of the World Land Speed Record

"The Fastest Man on Earth"

Andy Green is the current holder of the World Land speed record, and the first person to break the sound barrier on land. On 25 September 1997 in ThrustSSC he beat the previous record in Black Rock Desert, US, reaching a speed of 714.144 miles per hour (1,149.303 km/h).

TOPICS:

- Ambition
- Risk Assessment
- Holding Nerve
- Team Building
- Inspiration for Science and Technology
- Challenging to Next Generation of Engineers
- Educational Reach

LANGUAGES:

He presents in English.

IN DETAIL:

The Bloodhound Land Speed Record (LSR) team confirmed plans to challenge for the world land speed record using a zero-emissions rocket. Powered by concentrated hydrogen peroxide, the rocket will be used alongside the world's best jet-fighter engine when the Bloodhound LSR car attempts to reach speeds beyond 800mph in South Africa in 2021. Wing Commander Andy Green's team now set out to break the record again. Their mission statement is to create a unique, high-technology project and to share this engineering adventure with a global audience, inspiring the next generation by bringing science, technology, engineering and mathematics to life in the most exciting way possible.

WHAT HE OFFERS YOU:

Andy Green is a dynamic and inspirational man. He has learned about 'holding nerve' in just about everything he tackles from operations in Iraq and Afghanistan to the world-class challenges he sets himself on land.

HOW HE PRESENTS:

Andy's impressive operational record is matched by his wide experience of command, leadership and management, both in peacetime and under fire, and he has inspired a wide variety of audiences with his insights into military operations, risk management and the challenges of leadership.
