IN DETAIL:

In his special television episodes, such as "The Heist" and "Apocalypse," Derren delves into longer-term psychological conditions, orchestrating scenarios where participants engage in extraordinary feats, like conducting an armed robbery or believing the world has ended. With several Netflix series under his belt, including "The Push" and "Sacrifice," Derren continues to illuminate the incredible power of the human mind. His contributions have reshaped mentalism, transitioning it from a traditional format to a thrilling and widely popular form of entertainment. He openly disclaims any supernatural abilities, emphasising that his performances rely on psychology, intuition, hypnosis, body language interpretation, and the art of suggestion. Furthermore, he employs classic magician techniques like misdirection, sleight of hand, cold reading, and showmanship to captivate and intrigue audiences.
