

Dr Gregory Stock is a leading AI keynote speaker, biotechnology expert, bioethicist and bestselling author whose work explores how artificial intelligence, genomics and emerging technologies are transforming healthcare, business and the future of humanity. He helps organisations understand how AI, genomics and emerging technologies will reshape healthcare, business, society and what it means to be human.

TOPICS:

- Generation AI: How Artificial Intelligence Will Transform Human Society
- AI and the Future of Humanity Superintelligence, Ethics and Human Values
- Human Enhancement: From Genomics to Designer Humans
- The Future of Healthcare and Precision Medicine
- Biotechnology and the Next Scientific Revolution

LANGUAGES:

He presents in English.

PUBLICATIONS:

2026	Generation AI and the Transformation of Human Being
2026	The Book of Questions: Courage
2013	On the Cusp: New Paths in Healthcare and Medicine
2004	Redesigning Humans: Our Inevitable Genetic Future
2000	Engineering the Human Germline

1994 Metaman: The Merging of Humans and Machines into a Global Superorganism

IN DETAIL:

Dr Stock founded Socratic Sciences, creator of Fathm, a question-driven communications platform designed to foster understanding, community and social connection as an antidote to traditional social media. He is also leading OnlyHuman, a broad initiative exploring the future of humanity in an age of accelerating technological change. A strong advocate for ambitious biomedical research, Dr Stock co-founded the Harris Center for Precision Wellness at the Icahn School of Medicine at Mount Sinai and UCLA's Program on Medicine, Technology and Society. He also co-founded Signum Biosciences, serving as CEO for six years and leading efforts to develop novel therapies for Alzheimer's disease and identify neuroprotective natural products.

WHAT HE OFFERS YOU:

Drawing on decades at the forefront of science and innovation, he helps organisations understand the profound changes transforming healthcare, business and society. Blending scientific expertise with ethical insight, Gregory Stock challenges audiences to think differently about the opportunities and risks of AI, human enhancement and emerging technologies, leaving them inspired, informed and better prepared for the future.

HOW HE PRESENTS:

Provocative, engaging and highly accessible, Dr Stock distils complex scientific and technological advances into compelling insights about how they will transform our lives and challenge our understanding of what it means to be human.
