

John Nosta

The World's Leading Innovation Theorist in Technology, AI & Medicine

"A leading voice in the convergence of technology and health"

John Nosta is one of the world's leading innovation theorists, working at the intersection of technology, AI, medicine, and human creativity. As the Founder of NOSTALAB, a globally recognised think tank, he is a sought-after voice on how exponential technologies are redefining business, health, and society.

TOPICS:

- The Future of Health and Technology Innovation
- Humanising AI: Putting People at the Centre of Exponential Change
- The Digital Health Revolution – How Technology Will Extend and Expand Our Lives
- Genius Is Our Birthright and Mediocrity Is Self-Imposed
- Longevity and the New Technological Promise for Tomorrow
- The Convergence of Medicine, Technology, and Humanity

LANGUAGES:

He presents in English.

IN DETAIL:

John is a prominent thinker deeply immersed in technology, science, medicine, and innovation. He helps define, dissect and deliberate global trends in health and beyond, consistently ranked among the top names in digital health and recognised as a thought leader in emerging technologies. He is a member of the Google Health Advisory Board and serves as a WHO Digital Health Expert. A frequent contributor to Fortune, Forbes, Psychology Today and Bloomberg, he has built his career on the "science of innovation". In addition to demystifying complex medical and scientific ideas, John is at the forefront of conversations about artificial intelligence, the future of human-machine collaboration, and how to humanise technology.

WHAT HE OFFERS YOU:

John Nosta translates the complexity of cutting-edge science and technology into practical insights. From personal longevity strategies to the future of AI, from health innovation to redefining consumer engagement, he empowers audiences to understand and act on the forces driving exponential change.

HOW HE PRESENTS:

John's engaging style and authoritative content help individuals appreciate the powerful convergence of health, technology and consumer empowerment.
