

Lisa Forte

Social Engineering & Cyber Security Expert

"One of the leading experts on cybersecurity and cybercrime"

Lisa Forte is an expert in the human side of cyber security and social engineering. In 2018 she won the "Top 100 Women In Tech" Awards recognising her achievements and contributions to the cyber security industry.

TOPICS:

- Hacking
- Social Engineering
- Cyber Crime
- Cyber Security
- Women in Tech

LANGUAGES:

She presents in English.

IN DETAIL:

Lisa began her career in counter-terrorism intelligence for a UK Government agency before moving into one of the UK Police Cyber-Crime Units dealing with serious cybercrime cases both in the UK and abroad. Through these experiences she has gained a unique insight into darker side of human nature and has led to her becoming one of the leading experts on cybercrime cases involving social engineering and psychological manipulation. Lisa founded Red Goat Cyber Security in 2017 to teach companies about the methodologies used by cyber criminals. Her areas of expertise include social engineering, the psychology of persuasion, insider threats and rehearsing for a cyber-attack. She has conducted ground-breaking research into the psychology behind insider threats and created the first ever GCHQ certified social engineering course.

WHAT SHE OFFERS YOU:

Lisa delivers dynamic and engaging presentations based on her expert personal experiences of dealing with cybercrime cases and the research she has done into how cyber criminals use psychological principles in their activities.

HOW SHE PRESENTS:

An experienced cyber security trainer, she knows how to effectively communicate her message to all types of audience in a lively, informative and engaging manner.
