

Michael Wooldridge holds the position of Professor of Computer Science at the University of Oxford and serves as the Director of Foundational AI Research at The Alan Turing Institute. In his role at the institute, he leads the development of the AI program, with a specific emphasis on advancing research in multi-agent systems.

TOPICS:

- Understanding AI
- Science Communication
- The Future of Generative AI
- Emerging Technologies

LANGUAGES:

He presents in English.

PUBLICATIONS:

2020 A Brief History of Artificial Intelligence

IN DETAIL:

Michael Wooldridge is an esteemed academic and author with a focus on Artificial Intelligence. Holding the position of Professor of AI at the University of Oxford, he also serves as the Director for AI at the Alan Turing Institute in London. Recognised for his contributions, Michael has been honoured with prestigious awards including the Lovelace Medal from the British Computer Society and the Outstanding Educator Award from the Association for the Advancement of AI. Notably, he has held leadership roles as President of the European Association for AI and President of the International Joint Conference on AI (IJCAI). Additionally, he contributes significantly to the field as the Editor-in-Chief of Artificial Intelligence, a leading academic journal in AI.

WHAT HE OFFERS YOU:

Artificial Intelligence (AI) is the most hyped and most important technology of the century to date. Michael's approach to AI isn't just about algorithms but emphasises the societal implications of this rapidly evolving technology.

HOW HE PRESENTS:

Michael Wooldridge is an engaging Speaker who demonstrates his passion for advancing the frontiers of AI research and promoting its responsible use for the benefit of society.
