He speakes in English and French.

PUBLICATIONS:

2023	The Economics of Creative Destruction
2021	The Power of Creative Destruction

IN DETAIL:

Widely regarded as one of the most influential economists of his generation, Philippe Aghion is best known for developing the groundbreaking Aghion–Howitt model of endogenous growth and advancing the modern Schumpeterian theory of creative destruction. In 2025, he was awarded the Nobel Prize in Economic Sciences alongside Peter Howitt and Joel Mokyr for demonstrating how innovation, entrepreneurship and technological renewal drive long-term prosperity and economic progress. Aghion's pioneering research has transformed understanding of innovation-led growth, competition policy, education, inequality and climate economics.

WHAT HE OFFERS YOU:

Aghion combines Nobel Prize-winning research with real-world policy experience to provide audiences with a unique perspective on the economic forces shaping the future. His engaging and insightful presentations provide organisations with the knowledge needed to navigate disruption, harness innovation and thrive in a rapidly changing global economy.

HOW HE PRESENTS:

His presentation style is authoritative yet accessible, using real-world case studies and cutting-edge data to challenge conventional thinking. He commands the stage with a warm, eloquent, and commanding presence, leaving audiences inspired.
